

Effective use of resources with fleet management from guard systems

The choice is yours:
Basic,
Pro or
Enterprise

Fleet Management

Guard Systems fleet management system gives you control of your resources so that you can achieve higher efficiency and quality of your services. You get a better overview and easier administration of your resources. A wide range of features and a flexible report generator give you a good foundation in order to optimize your operations. Select a level that suits your needs.

ADVANTAGES

- **Real time positions**
Provides continuous updating of positions in the map.
- **Reports**
Provides content-rich reports that show how your resources are used.
- **Zone alarms**
Receive notifications when vehicles are leaving or arriving in predefined zones.
- **Zone registration**
Create zones to record how your vehicles are used. Great tool for optimizing your operations.
- **Service module**
Generate a service plan for your equipment and receive alerts when it's time for service. The module lets you register relevant information about the equipment.
- **Integrations**
Make your data available to other enterprise systems through (API).

INCLUDED SERVICES

- Free support 8-16 all weekdays.
- Preinstalled SIM card and configured software.
- Data traffic and roaming costs.
- Assistance in case of theft from our alarm central(24/7).
- Free update of maps and application
